

Rapidly Multiplying Customers' Value

SurePath from Management Systems International (MSI) ensures successful certification.

Why Achieve ISO 9001, 13485, 14001, 45001 Certification?

Every company has safety issues and affects the environment. Companies must not only meet, but also continually improve quality requirements to fulfill customer demands. When your company achieves certification, you optimize business processes and improve your impact on the environment. Management Systems increase customer confidence in your top quality, environmentally, and health and safety conscious company, products and services. And contribute to your global effort of enhancing customer satisfaction and sustainable development.

ISO - The Quality Standards

ISO 9001 and 13485 specifies requirements for implementing a quality management system (QMS) to:

- » Address, integrate and improve sales, design, purchasing, production and other business processes
- » Ensure quality products and services that consistently fulfill customer, legal and other requirements
- » Enhance customer confidence in products and services

ISO 14001 - The Green Standard

ISO 14001 specifies requirements for systematically managing Environmental performance to proactively improve impact by:

- » Enabling Environmental policy and objective development considering customer, legal and other requirements
- » Ensuring you achieve Environmental policies and objectives

ISO 45001 - The OHS Standard

ISO 45001 specifies requirements for systematically managing Occupational Health and Safety performance to proactively improve impact by:

- » Enabling Occupational Health and Safety policy and objective development considering participation of workers, customer, legal and other requirements
- » Ensuring you achieve Occupational Health and Safety policies and objectives

SOFTWARE SOLUTIONS

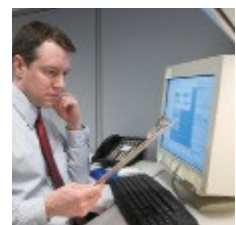

Using proven web-based management solutions, we can substantially simplify your workload, workflow and improve your business processes. As a result, you valuably:

- » Streamline document, process and procedure controls easily with absolute revision tracking and distribution as well as integrate controls with other systems such as auditing, management review and corrective and preventive actions
- » Obtain full visibility of internal audit planning, noncompliant issues, risk, legal and regulatory compliance, supply chain processes, and health and safety issues and actions
- » Assess and manage compliance, quality assurance, risk and continuous improvement efficiently
- » Manage and analyze nonconformance reports (NCR), corrective action reports (CAR) and Risks and Opportunities with ease
- » Locate, sort and extract real-time data anytime, from anywhere
- » Automate process and analysis, using webbased solutions

INNOVATIVE TRAINING

Our wide range of training courses and now offering online methods offer easy-to-understand instruction on your quality, environmental, or health & safety management system. In our dedicated training facility or on your company site – whichever you prefer, we provide training in the context of your specific industry, business and activities. As a result, you beneficially obtain custom education on:

- » ISO 9001, 13485, 14001, 45001 standard and certification
- » Quality, environmental, or health and safety management system planning, implementation and maintenance
- » Internal and lead auditing
