

The **SurePath™** Turnkey Solution for ISO Certification

Achieving ISO certification is an introspective process that requires establishing standard processes and procedures. Utilizing our unique tools, templates, operating procedures, and training courses, MSI has refined a series of cost-effective steps that expedite this process to a successful conclusion. Our proven SurePath™ turnkey solution will fast-start your ISO certification process, cost less and achieve a successful conclusion with minimal disruption of your daily operations.

The *SurePath* turnkey ISO solution is your fast answer for becoming ISO 9001, 13485, 14001, 45001 certified and the added ISO 7101. And because we've supported over 300 nationwide companies through full ISO implementation, training, or consulting engagements, you can be confident that MSI has a proven program that is guaranteed to get results! Here's what your SurePath solution will include:

Planning of your ISO implementation process by determining reasonable milestone target dates, documentation to be developed, tasks to be accomplished and personnel to be assigned to program development.

Quality and/or Environmental or Safety/Health documentation (Manual and Procedures) prepared by MSI and tailored to your specific operating processes. Our tools, templates and procedures have withstood the scrutiny of many Registrar Audits and have been proven to meet the ISO Standard requirements.

ISO Overview training and “hands on” Internal Audit training for individuals you identify as internal auditors. The class attendees perform audits to initiate your internal audit program.

Resources to manage the implementation process of the Quality and/or Environmental, Safety/Health Management System.

Guidance and support during the Registrar audits. MSI is beside you during the Pre-Assessment(optional), Scope and Registration audits to help address any Registrar concerns.

Because MSI experts are preparing the documentation, training your personnel, and helping to implement procedures, your company will prepare for ISO Registration with minimal impact to your daily operations.

SurePath™ – A Turnkey Solution for ISO Certification

For ISO 14001 Aspect identification is part of the planning phase and for ISO 45001 Job Hazards is part of the planning phase. The Pre-Assessment audit is optional and suggested based on risk levels. There is the option to forgo the Internal Audit training and just have MSI perform the full system of internal audits. With five major milestones, the MSI *SurePath* turnkey ISO solution is your expedited answer for ISO certification. What is not shown in the diagram is the now mandated scope audit that is completed by the qualified registrar auditor. We also assist in selecting the registrar as part of the project. Projects begin with a Kick-Off Meeting at your facility and culminate with your ISO certification. Even after achieving ISO Registration, MSI is there to assist you with ongoing ISO activities that enhance your business processes and drive down costs.
